

## **Current Connections: February 2026**

February is about turning intention into action. With the year in motion, we're energized by what's ahead and appreciative of the continued trust and collaboration of our team and partners. We're excited to keep building, improving, and moving forward in the months to come.

**Strengthening Our Foundation, Elevating Our Future**

Jeff Hopkins

Lead Field Coordinator

With the long, cold days of winter coming to an end and spring on the horizon, it's the perfect time to focus on growth. Growth happens in two ways—personally and company-wide. In my 28 years at H&W, I have witnessed tremendous growth within our company, and along the way, I have grown both professionally and personally. Watching H&W evolve over the years has been both rewarding and inspiring.

One of the main reasons we have been able to grow is thanks to our field employees. They have my utmost respect and admiration for their hard work and commitment, which help keep the company running efficiently every day. H&W has remained dedicated to supporting employee growth by offering opportunities such as H&W University, safety classes, lift training, and hands-on jobsite experience. Through these programs, employees are able to advance within the company using our banding system and continue growing alongside H&W.

Along with the company's growth, H&W has added several key departments to better support our operations—one of those being Field Coordination. The Field Coordination team plays a vital role in ensuring our jobsites run smoothly and efficiently. We act as a bridge between the office and the field, helping with scheduling, manpower planning, communication, and overall project support.

Our Field Coordination team is always available to support all field employees, no matter the situation or time of day. Our primary goal is to help the growth of our employees and the company.

As we move into this new season, let's keep working together and building on what we have started. Growth takes teamwork, hard work, and strong communication. My goal for all employees is to continue their personal and professional growth, helping H&W reach new heights!

GOD BLESS!

---

## PROJECT PROFILE: TOYOTA TSUSHO

### Project Managers: Mike Lee

H&W Electrical Corp is currently performing a comprehensive turnkey electrical installation for Toyota Tsusho's storage warehouse facility in Greensboro, North Carolina. The project includes a complete electrical distribution system designed to support daily operations, as well as a dedicated hazardous materials storage area that requires enhanced safety, reliability, and strict code compliance. Our scope also includes significant fire alarm system upgrades to ensure the facility meets all life safety requirements, along with the installation of a standby generator system to provide uninterrupted power during outages. With safety and operational continuity as top priorities, our team is working closely with all stakeholders to deliver a resilient, fully integrated electrical solution that supports both routine warehouse functions and critical emergency response needs.
