

JOB DESCRIPTION

Underground Equipment Operator

H&W Electrical | Greenville, SC

Department:	Field Operations	Reports To:	Project Superintendent
FLSA Status:	Non-Exempt / Hourly	Openings:	2
Travel Required:	Possible — local and regional depending on project assignment		

Position Summary

H&W Electrical is seeking experienced Underground Equipment Operators to support our underground electrical infrastructure installations. This role is critical to the safe and efficient execution of underground conduit, ductbank, and utility installation on industrial and commercial projects.

Primary Responsibilities

- Operate excavation and trenching equipment for underground electrical installations
- Assist with installation of underground conduit, ductbanks, manholes, and pull boxes
- Maintain and perform pre-operation inspections on all equipment
- Adhere to all excavation safety standards including OSHA trenching and shoring requirements
- Coordinate with field electricians and superintendents to ensure accurate underground installations
- Maintain a clean and safe work site

Required Qualifications

- Minimum 2 years of experience operating excavation/trenching equipment
- Experience with underground utility installation strongly preferred
- Knowledge of OSHA excavation and trenching safety standards
- Valid driver's license required; CDL preferred
- Ability to read site plans and layout drawings

Physical Requirements

- Ability to operate heavy equipment for extended periods in outdoor environments
- Must be able to lift up to 50 lbs and work in variable weather conditions

About H&W Electrical
